Vaccine Information Update - February 16, 2021

Concordia Place is scheduled to administer the second dose of COVID-19 vaccine on February 22, 2021.

Residents who have already consented to receive the vaccine

No further action is required as the consent was for both the first and second doses of the vaccine.

Residents who did not receive the first dose in January

Concordia Place team members have been in contact with the residents who make their own decisions or substitute decision makers to review information about the vaccine and the consent process.

Concordia Place will compile the number of residents who consent to the vaccine and submit this information to the region February 19, 2021 in advance of our administration date to ensure we receive the correct number of doses.

Administration of Second Dose

On February 22 a team of Concordia nurses and providers will vaccinate residents who have consented to the vaccine with Public Health and WRHA oversight. The team will also be responsible for closely monitoring the residents after the vaccine is given.
